About Us

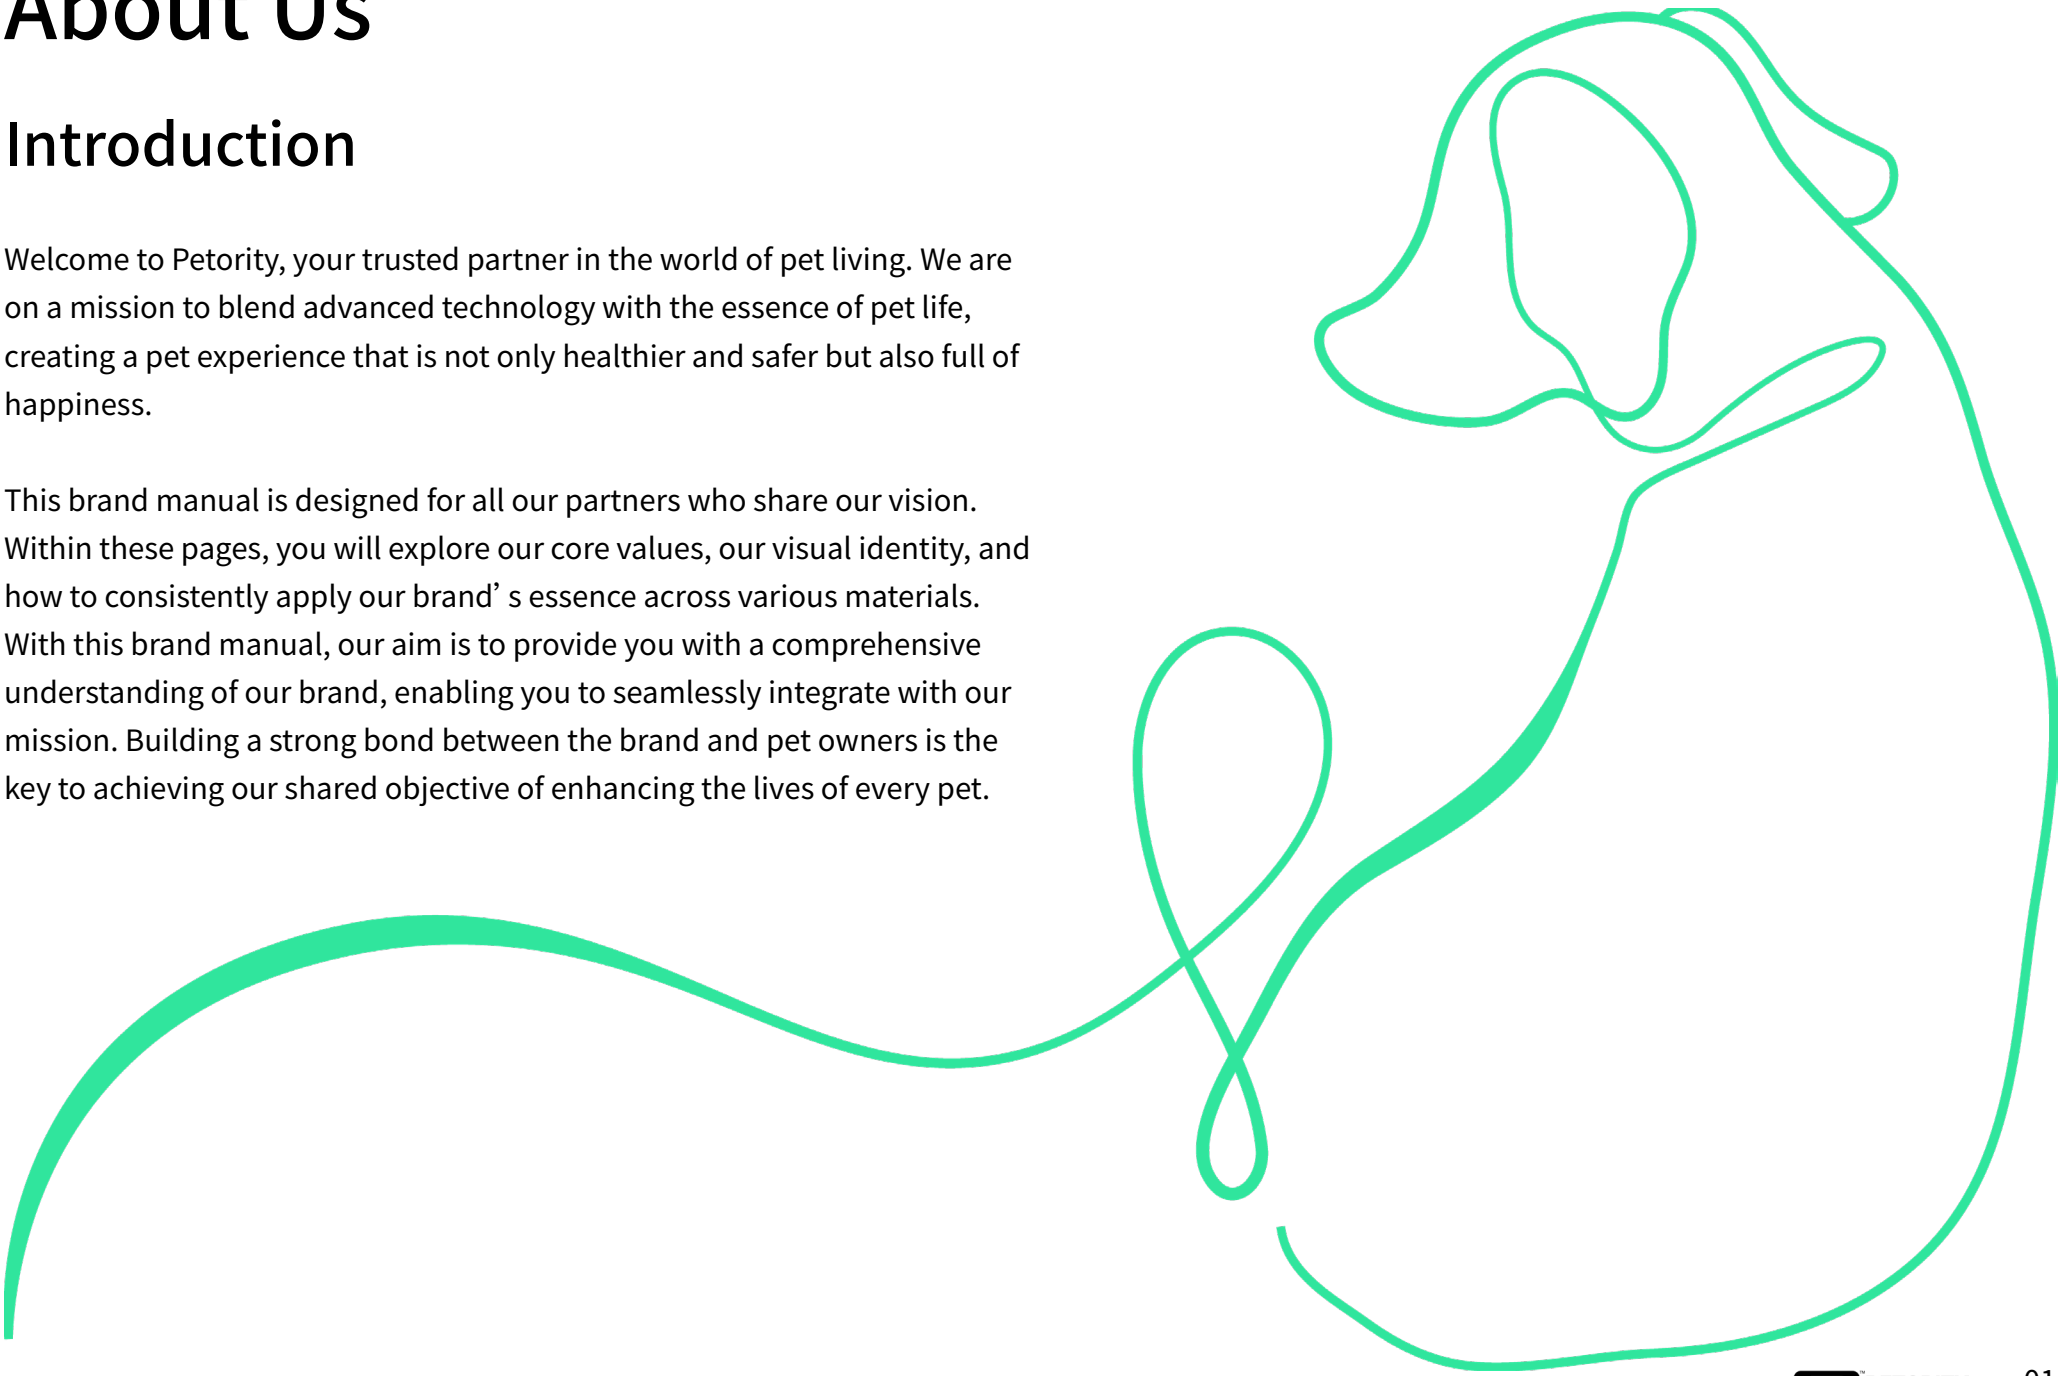
Introduction

Welcome to Petority, your trusted partner in the world of pet living. We are on a mission to blend advanced technology with the essence of pet life, creating a pet experience that is not only healthier and safer but also full of happiness.

This brand manual is designed for all our partners who share our vision. Within these pages, you will explore our core values, our visual identity, and how to consistently apply our brand’ s essence across various materials. With this brand manual, our aim is to provide you with a comprehensive understanding of our brand, enabling you to seamlessly integrate with our mission. Building a strong bond between the brand and pet owners is the key to achieving our shared objective of enhancing the lives of every pet.



Brand Essence

Vision

To foster stronger human-pet relationships by delivering innovative products and high-quality services, elevating the quality of pet life while meeting the needs and expectations of pet owners.

Mission

To foster closer human-pet bonds through innovative technology and high-quality products, creating a healthier, safer, and happier pet living experience.

Values

・**Caring:** Pet happiness and health are our top priorities. Our products and services reflect our deep care for pets and pet owners, striving to create a better life.

・**Innovation:** We believe that technological innovation is key to enhancing pet life. We continuously seek novel approaches and creative solutions to meet the needs of pet owners and their beloved pets.

・**Quality:** We are firm believers in the importance of high quality. We are committed to delivering superior products and services that meet the highest standards of expectation.

Smart Devices

Smart Collar

Smart Collar

Functions

Real-Time Location Tracking

Real-Time Location Updates:
Stay informed about your pet’ s movements anytime, anywhere.

Immediate Alerts:
Get instant notifications if your pet leaves a safe area, stay vigilant.

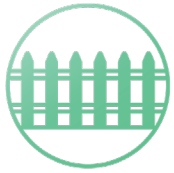
Customizable Settings:
Adjust the location update frequency as needed.

Real-Time Heart Rate Monitoring

Real-time Heart Rate Monitoring:
Supporting all pet breeds and fur lengths, enabling real-time heart rate monitoring.

Health Insights :
Real-time heart rate monitoring allowing for early health insights.

Anomaly Detection:
Timely health protection actions through real-time heart rate anomaly detection.



Virtual Safety Fencing

Virtual Fences Setting:
Define safe areas and customize fences for your pet’ s boundaries.

Define safe areas and customize fences for your pet’ s boundaries Activity Tracking Report:
Presenting insights into your pet’ s past activities and behavior patterns.

Real-time Alert Notifications:
Receive immediate notifications when your pet enters or exits safe zones.

Over Wellness Report

Behavior Changes:
Help identify changes or trends in your pet’ s behavior.

Long-Term Trends:
Observe long-term trends in your pet’ s activity levels, sleep patterns, and more.

Customized Health Reports :
We provide individualized health advise for your pet based on heart rate data and activity tracking,etc. (currently under development)

Recall and Pet Control

Instant Connection:
Establish an immediate voice connection with your pet through automatic calling.

Safe Recall in Emergency:
Automatically convey urgent commands to bring your pet back remotely for a safe return.

Instant Interactive Communication:
Calm your pet’ s emotions through voice calls, ensuring their emotional well-being.

Design in Singapore，Manufacture in P.R.C

Quick Drying | Leak Proof | Odor Neutralizer | Puppy Attractant | 5 layers

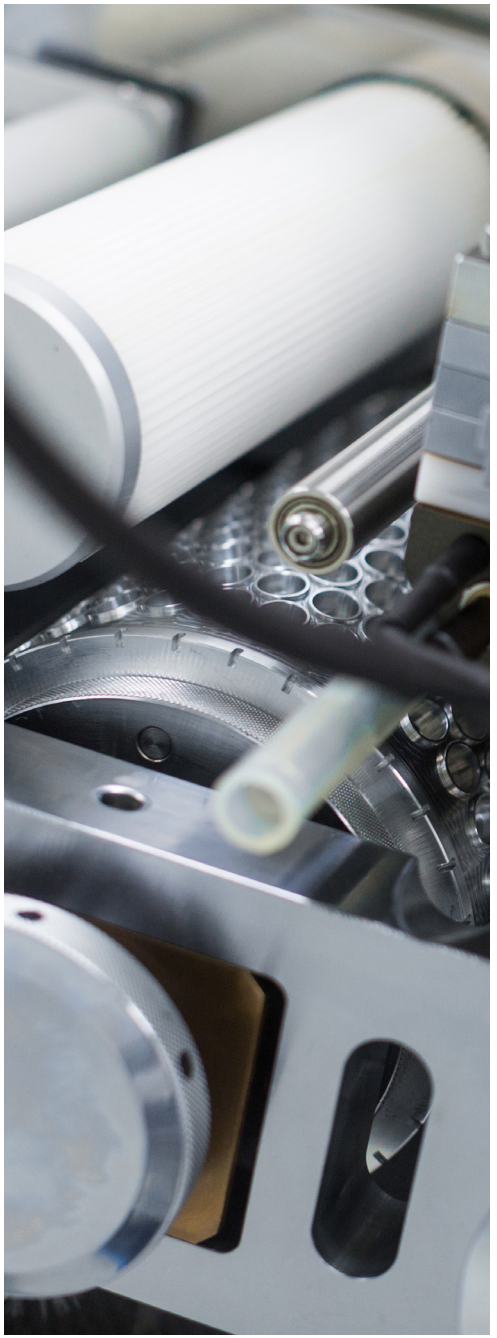
Support Information



Information on Polyethylene (PE) films Product Lines

1. Production Lines: The facility is equipped with 15 PE film production lines. This indicates a significant production capacity, allowing for the manufacture of a wide range of PE film products.

2. Product Variety and Specialization:
• The facility can produce cast films in various colors, which suggests a versatility in product customization and the ability to meet diverse market needs.
• It specializes in 3-layer laminated PE films, enhancing the films' physical properties and making them suitable for specific applications that require multi-layered film structures for added protection or performance.
• The specialization in producing PE films with a weight range of 17 gsm (grams per square meter) to 40 gsm and a width of up to 3.6 meters indicates a focus on lightweight yet durable film products. This range is particularly relevant for applications that require a balance between strength and minimal bulk.

3. Printing Capabilities: With 4 printing machines, the facility can add designs, logos, or information directly onto the films, enhancing their aesthetic appeal or functionality. This is crucial for products that require branding or specific user instructions.

4. Product Characteristics: The PE films produced boast several key characteristics:
・Uniform weight distribution ensures consistency in product quality and performance.
・High strength and good toughness make the films durable and resistant to tears or punctures, suitable for protective applications.
・Softness and hygiene are critical for medical and health-related applications, where comfort and cleanliness are paramount.

5. Applications: The films’ properties make them ideal for use in a variety of sensitive and demanding applications, including:
・Diapers and sanitary napkins, where softness, hygiene, and durability are essential.
・Adult incontinence products, requiring reliability and comfort.
・Surgical gowns and other medical fields, where barrier protection and hygiene are critical.
・Pet care & hygiene products

Information on Spunbonded Non-woven Product Lines

Our advanced manufacturing setup includes three cutting-edge production lines dedicated to creating spunbond non-woven fabrics. These fabrics are engineered to be lightweight yet robust, with weights ranging from 9 to 150 gsm, accommodating a broad spectrum of industry requirements.

Distinguished Fabric Qualities:

- Precision Engineering: Our fabrics are crafted to exhibit uniformity in structure, ensuring consistent quality and performance.
- Durability: We prioritize high tensile strength and toughness to withstand rigorous use, coupled with superior abrasion resistance.
- Chemical Resilience: The materials are designed to resist both acid and alkali exposures, ensuring longevity in various environments.
- Comfort and Safety: With a focus on softness, hygiene, and breathability, our fabrics are water-repellent and feature exceptional antibacterial properties to meet the highest standards of medical safety.
- Skin-Friendly: Our products are non-toxic, emit no odor, and are non-irritating, making them suitable for direct skin contact in applications like diapers and medical gowns.
- Protective Barrier: The spunbond non-woven fabrics are adept at resisting and isolating a myriad of contaminants, including dust, particles, alcohol, plasma, and other hazardous liquids.

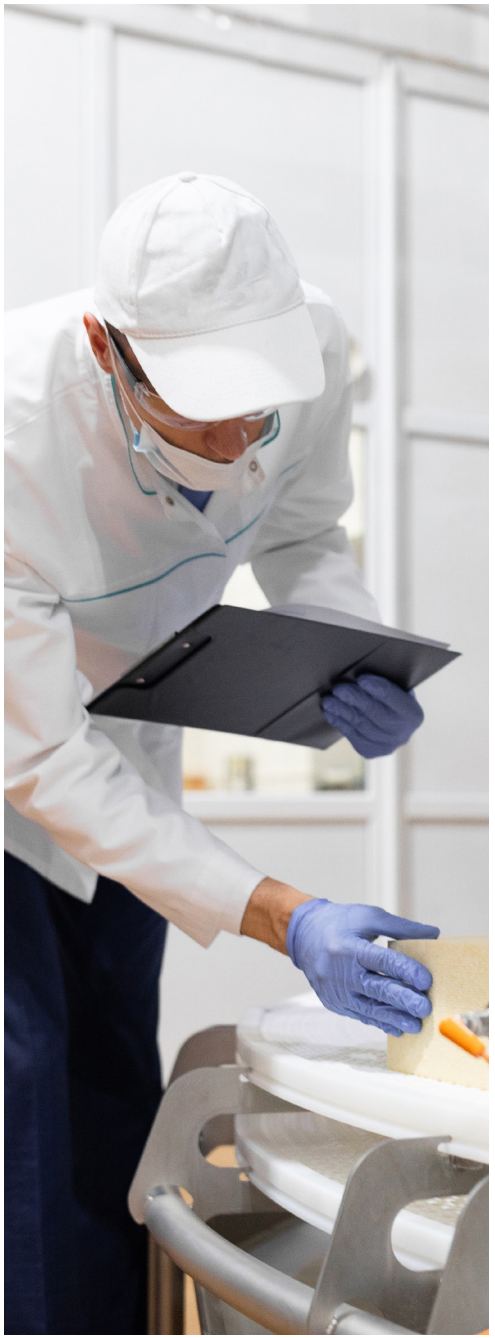
Comprehensive Quality Assurance Protocol

Our manufacturing process is fortified with an integrated quality control system that permeates every stage of production, ensuring the highest standards are met consistently.

- Rigorous Material Testing:
Upon arrival, all raw materials undergo meticulous testing to verify quality and adherence to our stringent standards, guaranteeing the integrity of our products from the very beginning.
Dedicated Monitoring and QC Checks:
The production environment is subject to continuous surveillance, with our Quality Control (QC) team conducting regular spot checks. This proactive approach ensures that conditions remain optimal and that all processes align with our exacting specifications.

- Final Product Inspection:
Before any product leaves our facility, it is thoroughly inspected to ensure that it meets our high-quality benchmarks. This final vetting process is crucial to maintaining product excellence and customer satisfaction.

- ISO9001:2015 Quality Management System Authentication
- ISO14001:2015 Environment Management System Authentication
- EU CE Authentication
- EU BSCI Authentication
- ISO13485:2016 Medical Products Authentication
- WAC Social Responsibility Authentication
- U.S. SCA Counter-terrorism Authentication
- U.S.FDA Authentication and filing registration of domestic medical apparatus and instruments category.



Underpads and Training Pad

Our comprehensive range of Underpads is designed with versatility in mind, offering multiple sizes and levels of absorbency to meet diverse requirements. They deliver dependable protection, ensuring surfaces such as beds and chairs remain clean and dry. Each underpad is meticulously engineered with a six-layer construction for maximum efficiency:

• Top Layer: A soft, hydrophilic non-woven fabric creates a gentle touch against the skin, prioritizing comfort.
• Absorbent Core: Utilizing Super Absorbent Polymer (SAP) and a fluff pulp layer, our underpads rapidly capture and encapsulate liquids, maintaining dryness.
• Enhanced Absorption: The inclusion of a super absorbent tissue layer further solidifies our commitment to superior absorbency.
• Breathable Backing: The final layers consist of a breathable PE film coupled with a non-woven material, ensuring a soft, waterproof barrier that promotes air circulation.

This advanced design not only offers comfort and protection but also ensures a high-performance solution for incontinence and care needs.

Customised Underpad Sizing Chart

Inch Size	17”x24”	23”x24”	24”x24”	24”x36”	30”x30”	30”x36”	31”x60”	36”x70”	39”x90”
Centimeter Size	45 x 60 cm	58 x 60 cm	60 x 60 cm	60 x 90 cm	76 x 76 cm	76 x 90 cm	80 x 150 cm	90 x 177 cm	100 x 230 cm

Notes: The chart displays our standard sizes, but we also offer customized options. We have a variety of back sheet colours available to meet diverse needs.

Premium Underpad

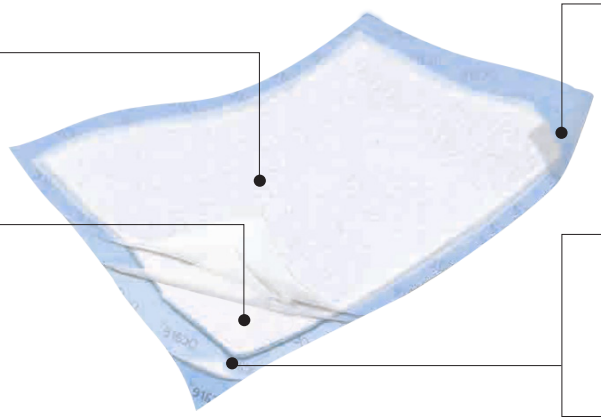
Product Featured

Spunbond Non-woven Top Layer
High-quality soft surface keeps dry and comfortable for a long time

Super Absorption Core
Dual absorbent core is deigned to quickly lock in liquid and neutralize odors

Odor Control
High-quality super-absorbent polymer(SAP) and fluff pulp can effectively reduce unpleasant odors and prevent bacterial growth

Special Texture Design
The texture of diamond and dot are helpful to the liquid absorption, keeping wetness away from skin



Leak-Proof
Allows moisture vapor to transfer away from the patient while protectingbed linens, against leakage

Breathable Bottom Film
Airflow design allows skin to freely breathe, reducing heat buildup and without leakage

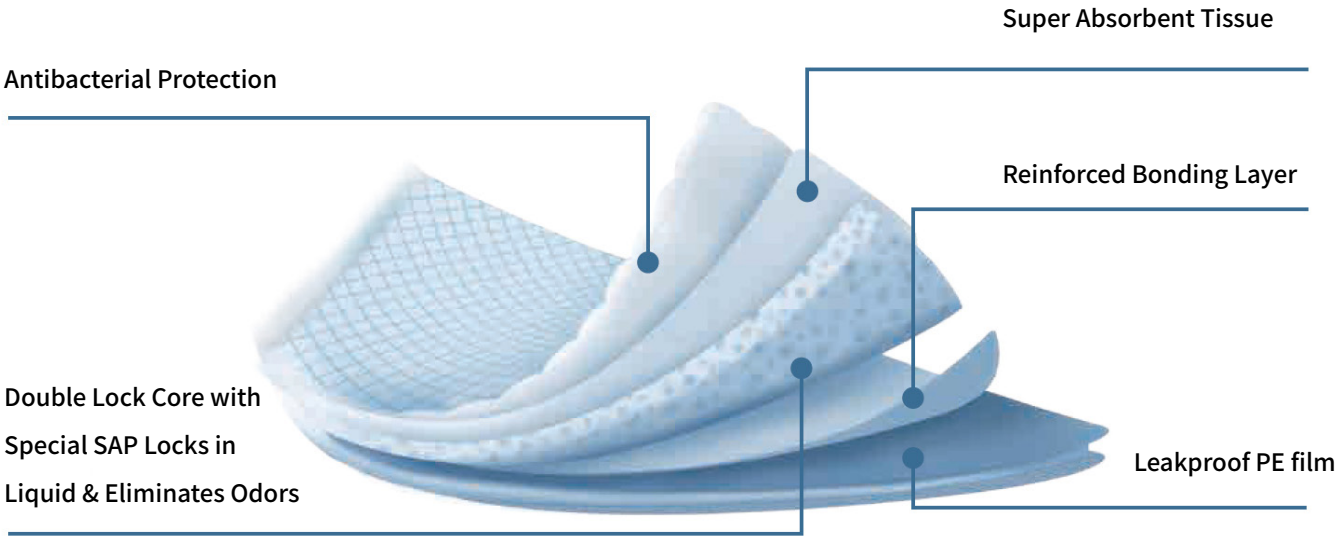
Cloth-Like Back Cover
Breathable laminated non-woven is ultrasonically bonded for aquilted look and feel

Soft & Dry Top Layer
Fast-dry surface prevents tracking

Odor Control
Effective odor control keeps your home clean and smell fresh

Leakproof & Breathable Back Film
Leak-proof guarantee prevents leakage of urine that can protect floor and carpets

Antibacterial
Natural antibacterial agent kill germ and mite



TRAINING
Easy training with bilt-in attractant

PROTECTION
5 layer pad for leak-proof protection

ABSORPTION
The super-absorbent core provides fast absorption to prevent tracking & leaking
